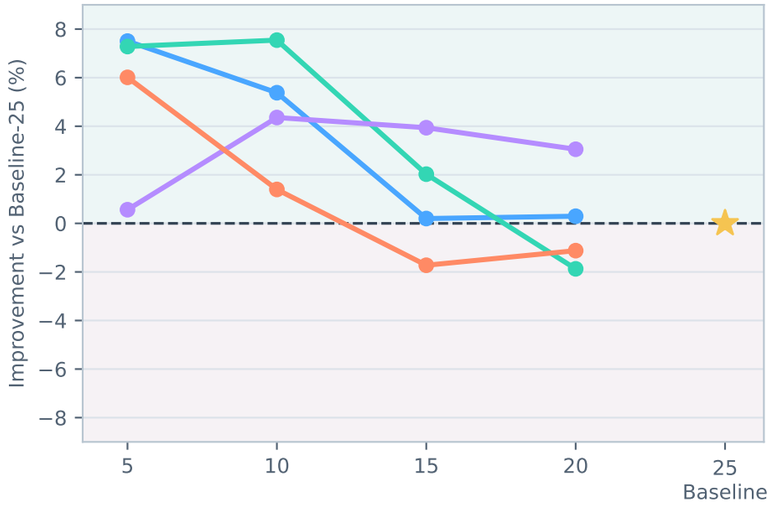
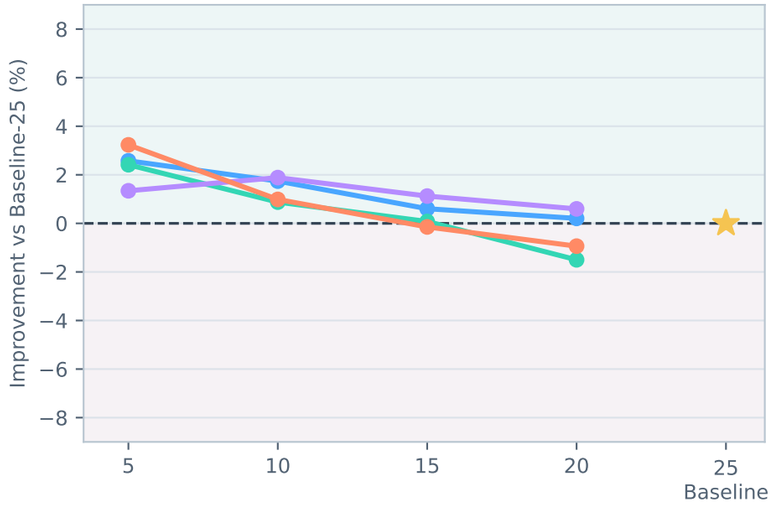
PATCH BUDGET — PERFORMANCE ACROSS K

Arrows show the original metric direction; plotted improvement is harmonized so upward always means better

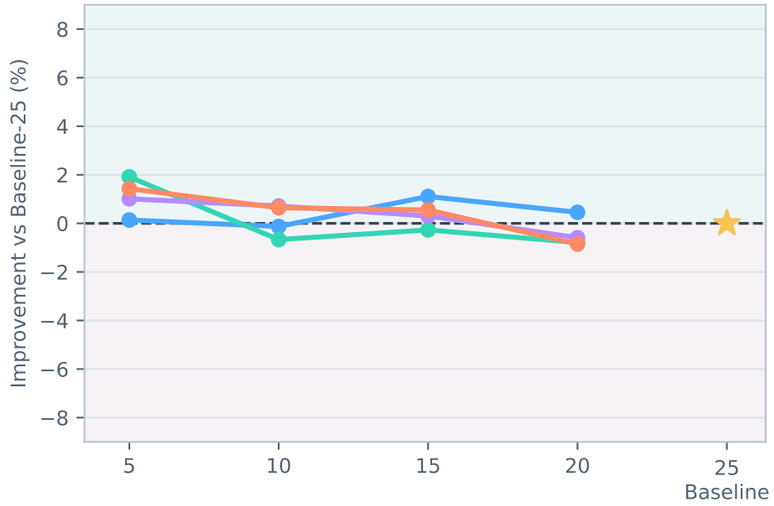
CCC ↑
Agreement in trend, mean and variance



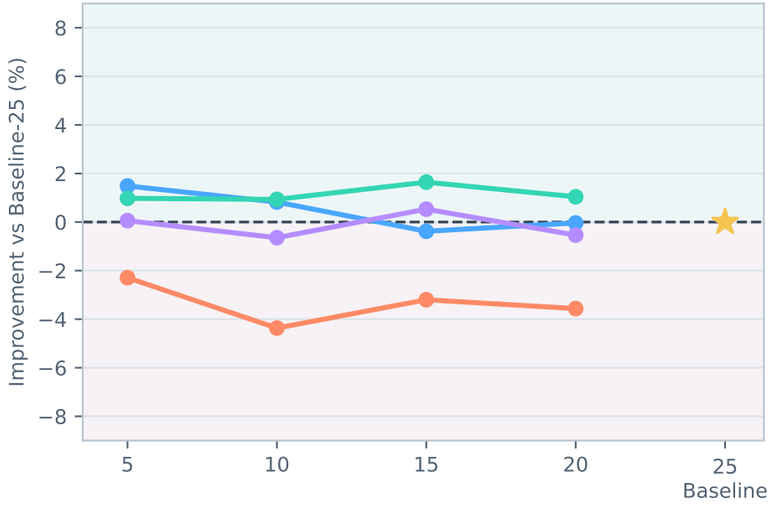
PCC(M) ↑
Mean correlation across 250 genes



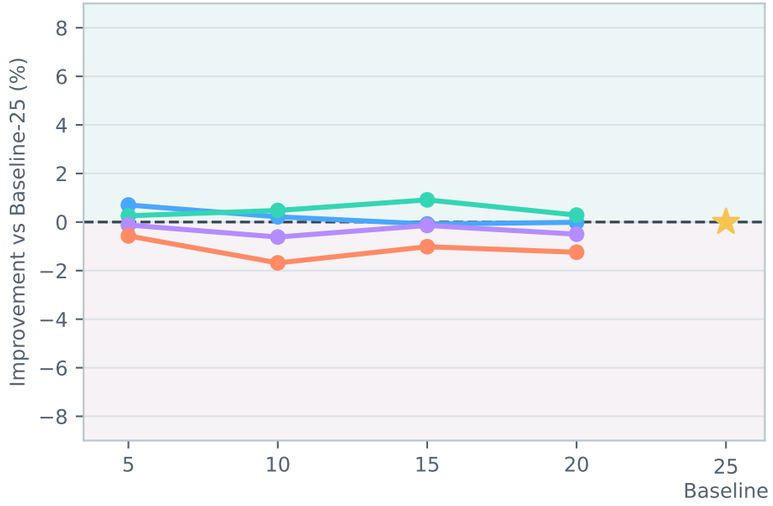
PCC(H) ↑
Mean correlation across top-50 genes



MSE ↓
Large errors count more



MAE ↓
Average absolute prediction error



HOW TO READ

0% = original TRIPLEX with 25 patches

Above 0 = better than Baseline-25

Below 0 = worse than Baseline-25

Random
Similarity
Diversity
ST Hard

K includes the central target patch.
Means across 8 patient-level folds.
